

READY TO WORK, PROVEN TO LAST

Severe Duty Contractor Body

Royal® Severe Duty Contractor bodies are built to handle tough jobs and heavy loads. The 3/16" contiguous steel frame rails and floor is a proven design that delivers strength and durability. Massive 24" tall, 10-gauge steel flat top boxes are ideal for mounting additional equipment. Focused on improving organization and proficiency, this package includes a heavy-duty drawer set.

Severe Duty is not just a name. It means these trucks deliver on durability, security, and versatility.

Standard features

Outfitted with a generous package of standard features, the Severe Duty Contractor body comes prepared—so you're organized, secure, and up and running on day one.

Massive top boxes are available in two choices to increase storage capacity and security

3/16" Contiguous tread plate steel floor and side rails deliver a solid platform for durability

Heavy-duty roll-out drawers set for additional productivity

Forklift loadable heavy-duty rack includes removable cross bars to extend its versatility and access to the bed. Welded front cradles hold bars when not in use.

Fortress security system provides five locking points on each compartment—including three featured in our ergonomic stainless steel Royal D-handle—

providing unmatched security for your equipment.

In-bed tie-downs are built in, for you to cinch down and secure your compressor, ladder, and tools as you travel to the job-site.

Royal Contractor bodies have been proven on job sites by fleets and professionals for over 40 years. Whether its a single vocational work truck or an on highway fleet, each body delivers durability, security and innovative storage solutions.
